description - Thunderbird program is a One-Stop-Test-Shop catering to AT&T's Enterprise-wide business critical applications. As part of this Fixed Price engagement various types of testing like System, Regression, Sanity and UAT support gets executed through Agile Methodologies on applications under Billing and Sales domain. The project has various critical applications as listed below with a team size of 80+ members.

Sales Express: An iPad & Browser based Mobile Sales application used by Sales Representatives & Service/Solution providers to sell Enterprise Products/Solutions

ESIGN: Allows customer to sign and AT&T to countersign digital version of contract document

AMPD: Enterprise billing application through which AT&T offers new and emerging billing products to the Business community

BEST: Business Solution application which performs consolidated billing and reporting for CRU Billing and Reporting Foundation Accounts

BIZCOMP: Comp Engine for business that supports the commission calculations for Enterprise Business and Small-Business sales force via Revenue and Unit based plans

FAST: Provides rate discounts to eligible Schools and Libraries

CXMT: Lets customers manage their Centrex line and feature arrangements of their services without going through the standard service-order procedure.
