Database Administrator II

Database Administrator III - BNY Mellon International Operations (India) PVT. LTD

Experience Details

Sql Dba- Exprience - Less than 1 year monthsCompany Details

company - BNY Mellon International Operations (India) PVT. LTD

description - SQL Server :

ïƒ˜ Installation, configuration of database servers using slipstream and setup all the maintenance jobs as per the standard policy on standalone as well as cluster environments with latest service packs

ïƒ˜ Installation of SSRS, uploading of .rdls and assigning correct data sources to reports. Grant necessary access to users & developers on reporting website. Aware of SSIS and designing packages as well.

ïƒ˜ Create and manage logins, users for database applications, assigning permissions as per requests, resolving user login issues.

ïƒ˜ Migration of all SQL server 2005/2008 servers to higher versions.

ïƒ˜ Setup of database refresh jobs on QA, DEV and UAT environments and fixing orphaned users.

ïƒ˜ Troubleshoot performance related issues.

ïƒ˜ Part of multiple projects to work with developers and provide all required support for testing in QA, UAT & DEV environment.

ïƒ˜ Lead the DR tests for database team.

ïƒ˜ Participate in database purge and archive activities.

ï𝑓˜ Writing codes for automating database administration tasks.

ï𝑓˜ Worked on automating DR tasks to start the agent jobs on multiple servers, restore databases for log shipped databases without manual intervention for online databases post DR activities.

ï𝑓˜ Provide support to vendor databases, follow up with the vendor calls and timely escalate to next level when there is no update in predefined timeline.

ï𝑓˜ Installation and configuration of smsql on windows server. Schedule jobs for creation and deletion of clones on sql server. Maintain backups using smsql.

MongoDB Server:

ï𝑓˜ Installation and configuration of MongoDB server.

ï𝑓˜ Creation of databases and collection.

ï𝑓˜ Creation new user and grant access using Ops manager.

ï𝑓˜ Monitor database servers using Ops manager.

Oracle & Sybase Server

ï𝑓˜ Managing and maintaining multiple instances of Databases on Linux and windows servers.

ï𝑓˜ Monitoring daily jobs includes backups, refresh and maintenance jobs.

company - Hewlett-Packard India Sales PVT. LTD. On the payroll of Softenger India PVT. LTD

description - ï𝑓˜ Installation of SQL Server on standalone as well as windows cluster environments with latest service packs

ï𝑓˜ SQL server installation using slipstream.

ï𝑓˜ Installation of reporting services

ï𝑓˜ Creating logins and users, assigning permissions as per requests.

ï𝑓˜ Security audit for all logins includes maintenance of unused and orphan user logins

ï𝑓˜ Create & Maintain daily and weekly jobs/maintenance plans includes backup, index rebuild/reorganize , update statistics and database consistency check

ï𝑓˜ Create linked servers and ensure connectivity between servers

ï*f˜* Monitor disk space proactively & Space management using data and log file shrinking

ï*f˜* Monitor blocking, deadlocks, open transactions and slow running queries during performance issues and highlight costly queries to developers.

ï*f˜* Configure alerts for deadlock and blocking to maintain performance

ï*f˜* Implementing high availability technologies like log shipping, AlwaysON, mirroring and its troubleshooting, also have knowledge on replication

ï*f˜* Successfully completed migration of Databases from one server to another

ï*f˜* Performing DR drills (Online/Offline) on quarterly basis

ï*f˜* Power shell scripting to monitor, restart SQL service and get Email alert for the service status.

ï*f˜* Maintain TNS entries for oracle client as per client requests.

ï*f˜* Interacting with customers for requirements

ï*f˜* Contacting customer to update the status of handling issues and service requests at every stage of resolution

ï*f˜* Managing proper escalation and notification matrix for all support levels
