Data Science

Skills * Programming Languages: Python (pandas, numpy, scipy, scikit-learn, matplotlib), Sql, Java, JavaScript/JQuery.

* Machine learning: Regression, SVM, NaÃ¯ve Bayes, KNN, Random Forest, Decision Trees, Boosting techniques, Cluster Analysis, Word Embedding, Sentiment Analysis, Natural Language processing, Dimensionality reduction, Topic Modelling (LDA, NMF), PCA & Neural Nets. * Database Visualizations: Mysql, SqlServer, Cassandra, Hbase, ElasticSearch D3.js, DC.js, Plotly, kibana, matplotlib, ggplot, Tableau. * Others: Regular Expression, HTML, CSS, Angular 6, Logstash, Kafka, Python Flask, Git, Docker, computer vision - Open CV and understanding of Deep learning.Education Details

Data Science Assurance Associate

Data Science Assurance Associate - Ernst & Young LLP

Skill Details

JAVASCRIPT- Experience - 24 months

jQuery- Experience - 24 months

Python- Experience - 24 monthsCompany Details

company - Ernst & Young LLP

description - Fraud Investigations and Dispute Services   Assurance

TECHNOLOGY ASSISTED REVIE

TAR (Technology Assisted Revie) assists in accelerating the revie process and run analytics and generate reports.

* Core member of a team helped in developing automated revie platform tool from scratch for assisting E discovery domain, this tool implements predictive coding and topic modelling by automating revies, resulting in reduced labor costs and time spent during the layers revie.

* Understand the end to end flo of the solution, doing research and development for classification models, predictive analysis and mining of the information present in text data. orked on analyzing the outputs and precision monitoring for the entire tool.

* TAR assists in predictive coding, topic modelling from the evidence by folloing EY standards. Developed the classifier models in order to identify "red flags" and fraud-related issues.

Tools & Technologies: Python, scikit-learn, tfidf, ord2vec, doc2vec, cosine similarity, NaÃ¯ve Bayes, LDA, NMF for topic modelling, Vader and text blob for sentiment analysis. Matplot lib, Tableau dashboard for reporting.

MULTIPLE DATA SCIENCE AND ANALYTIC PROJECTS (USA CLIENTS)

TEXT ANALYTICS - MOTOR VEHICLE CUSTOMER REVIE DATA * Received customer feedback survey data for past one year. Performed sentiment (Positive, Negative & Neutral) and time series analysis on customer comments across all 4 categories.

* Created heat map of terms by survey category based on frequency of ords * Extracted Positive and Negative ords across all the Survey categories and plotted ord cloud.

* Created customized tableau dashboards for effective reporting and visualizations.

CHATBOT * Developed a user friendly chatbot for one of our Products hich handle simple questions about hours of operation, reservation options and so on.

* This chat bot serves entire product related questions. Giving overvie of tool via QA platform and also give recommendation responses so that user question to build chain of relevant anser.

* This too has intelligence to build the pipeline of questions as per user requirement and asks the relevant /recommended questions.

Tools & Technologies: Python, Natural language processing, NLTK, spacy, topic modelling, Sentiment analysis, ord Embedding, scikit-learn, JavaScript/JQuery, SqlServer

INFORMATION GOVERNANCE

Organizations to make informed decisions about all of the information they store. The integrated Information Governance portfolio synthesizes intelligence across unstructured data sources and facilitates action to ensure

organizations are best positioned to counter information risk.

* Scan data from multiple sources of formats and parse different file formats, extract Meta data information, push results for indexing elastic search and created customized, interactive dashboards using kibana.

* Preforming ROT Analysis on the data hich give information of data hich helps identify content that is either Redundant, Outdated, or Trivial.

* Preforming full-text search analysis on elastic search ith predefined methods hich can tag as (PII) personally identifiable information (social security numbers, addresses, names, etc.) hich frequently targeted during cyber-attacks.

Tools & Technologies: Python, Flask, Elastic Search, Kibana

FRAUD ANALYTIC PLATFORM

Fraud Analytics and investigative platform to revie all red flag cases.

 FAP is a Fraud Analytics and investigative platform ith inbuilt case manager and suite of Analytics for various ERP systems.

* It can be used by clients to interrogate their Accounting systems for identifying the anomalies hich can be indicators of fraud by running advanced analytics

Tools & Technologies: HTML, JavaScript, SqlServer, JQuery, CSS, Bootstrap, Node.js, D3.js, DC.js
